  - Staffing requirements include WCS LabCorp healthcare professionals with experience in taking vitals.
- Reporting
  - Total participation tally at the end of the shift

### Product Model/Assumptions

- Event will take place in a location that promotes social distancing to keep participants and event staff safe
- WCS LabCorp will provide all supplies, but can use supplies if client has them readily available

- WCS LabCorp will use our question set, but can use question set from client upon request
- Evaluation will be a two-step process: if either step does not meet the criteria to return to work or stay at work the participant will be directed to the designated business leader at the client site to make the final decision on whether the individual can return to work or stay at work:
  - **Verbal Questionnaire:** The participant will provide responses to verbal questionnaire. If any of the responses indicate a risk exposure, the participant must proceed to the designated business representative at the client site after the temperature check is completed.
  - **Temperature Check:** If the participant's temperature is  $\geq 100.4$  (can be adjusted), the participant must proceed to the designated business representative at the client site for a final decision to return to work or stay at work
